## Professional Profile

Information Systems Engineering student (UNS, 2026) focused on Backend development and data architecture, currently undertaking a QA specialization course provided by Globant. Experienced in designing and deploying ETL pipelines that automated 100 % of metric ingestion. Background in backend feature development and database integrations in production environments, looking to apply my technical profile toward test automation and quality assurance.

## Education

**National University of the South** **Expected Graduation: 2026**
*Information Systems Engineering (94 % completed)* *Bahía Blanca, Buenos Aires, Argentina*

## Experience

**Backend Developer — Data Warehousing** **August 2025 – December 2025**
*RocketBeet* *Bahía Blanca, Buenos Aires, Argentina*

- Designed and shipped an end-to-end ETL pipeline on GCP Cloud Run + Docker (Python), eliminating 100 % of manual metric ingestion work for the product team.
- Automated ingestion and transformation of structured data, replacing recurring manual reports and enabling real-time data availability.

**Fullstack Developer — Internship** **May 2025 – August 2025**
*Plataforma Sustentabilidad Integral* *Bahía Blanca, Buenos Aires, Argentina*

- Refactored the interactive React Native map module by decoupling UI from business logic, improving rendering performance and enabling future extensions without technical debt.
- Built the end-to-end QR code check-in/checkout system (Expo, REST API, SQL), streamlining user access to shared bicycle stations.
- Delivered the passenger-driver booking module, closing the final sprint and enabling the product's production launch.

**Teacher — Digital Literacy** **2023**
*UPAMI UNS* *Bahía Blanca, Buenos Aires, Argentina*

- Designed and delivered technology workshops for senior citizens, enabling 20+ participants to independently use mobile apps.

## Projects

**National University of the South Choir Website** | *PHP, WordPress (coro.uns.edu.ar)* **2026**

- Redesigned and modernized the institutional web portal using PHP/WordPress, refreshing the digital identity of a 50+ member organization.

## Certifications

**Introduction to Docker** **March 2024**
*School of Update in Information Technologies (EATI)* *Bahía Blanca, Buenos Aires*

**Access to Relevant Information in the Era of Massive Data** **October 2023**
*XXIX Argentine Congress of Computer Science (CACiC) 2023* *Luján, Buenos Aires*

**Modern Android App Development: Jetpack** **March 2023**
*School of Update in Information Technologies (EATI)* *Bahía Blanca, Buenos Aires*

## Technical Skills

**Backend**: Python, REST APIs, SQL, PostgreSQL, ETL/Pipelines, Django, Laravel

**Frontend / Mobile**: React Native, Expo, Vue, JavaScript, PHP

**DevOps / Cloud**: Docker, GCP Cloud Run, Linux, Git/GitHub, CI/CD (GitHub Actions)

**Languages**: Python, JavaScript, Java (Strongly Typed), PHP, SQL

## Languages

**Spanish** | *Native*

**English** | *B2 - Cambridge English* **2015**

**Italian** | *A2 - Dante Alighieri Association* **2023**
